- **<u>Highest value/profile project undertaken:</u>**
  - ➤ I am currently involved in the development of a portfolio management system. The system is process driven and suitable for project managers. The system is being designed with a framework called K2, for our data storage we use SQL Server.

- **<u>Next highest value project undertaken</u>**:
  - ➤ <u>DigiTicket mobile application</u>: I assisted in the development of the Digiticket Application, the application`s main purpose is to accommodate users to book various tickets online, tickets such as Accommodation, Events and Restaurant tickets. I was involved in the front-end development of this application.

- **<u>Notable professional achievement:</u>**
  - ➤ In 2020 me and my team of 3 developed a mobile application called Linkit-up, this application focuses on linking students up with university and/or accommodation. It also has the ability to calculate a student's AP score. The app it builds with angular.js (the front-end), (node.js as its back-end) and firebase as storage (cloud storage).
